

There's not long left to register for the Essex Energy Switch!

The Essex Energy Switch helps residents save money on their gas and electricity bills. Since launching in 2014, the scheme has helped over 17,500 households in Essex save over £4.1m on their energy bills through the power of collective purchasing.

Residents can save on average £230 a year by switching their energy tariff or changing supplier.

It's free for Essex residents to register and only takes 5 minutes. All they need is a recent gas and electricity bill. Registration closes on 9 February and can be completed online at www.essex.gov.uk/energyswitch.

The more people that register, the bigger the potential savings as it increases the purchasing power and can lead to a better deal for residents which are not available on price comparison websites or directly from a supplier.

All tariffs will provide 100% renewable electricity and after receiving their offer from the winning supplier, residents can choose if they want to switch.

If you have any questions, or would like more information, please contact Luciana Almeida at Luciana.Almeida@essex.gov.uk.
